# University of North Texas at Dallas
## Fall 2016
### SYLLABUS

<table>
<thead>
<tr>
<th>MATH 1354-001 (Numbers and Operations for Teachers) (3Hrs)</th>
</tr>
</thead>
</table>

**Department of** | Mathematics and Information Sciences | **School of** | Liberal Arts and Sciences |

**Instructor Name:** | Dr. Ali Shaqlaih |
**Office Phone:** | 972-338-1569 |
**Email Address:** | ali.shaqlaih@untdallas.edu |
**Office Hours:** | Founders’ Hall 227: TR 8:00 am-9:50 am and by appointment |
**Classroom Location & Meeting Times:** | TR 10:00-11:20 am, Founders’ Hall-306 |

**Course Catalog Description:** The purpose of this course is to extend your knowledge about the fundamental mathematical structures presented in elementary and middle school Mathematics curriculum. To this end, we will cover numbers and operations including addition, subtraction, multiplication, division of positive and negative integers; number theory; rational numbers; proportional reasoning. The structure of the course will be based Texas standards.

**Prerequisites:** TSI-Complete or equivalent.

**Required Text:**
- Class notes and all the handouts distributed by the instructor in this class are as important as the textbook.
- MyMathLab access code; Course: Math 1354-001;

**Recommended Texts and References:**
- *Introductory Mathematics explorations for elementary teachers: Part I* by Mark L. Daniels and Mariacristina Caputo

**Access to Learning Resources:** UNT Dallas Library: (Founders Hall) phone: (972) 780-1616 web: [http://www.untdallas.edu/library](http://www.untdallas.edu/library)
Course Goals

The goal of this course is to:

- Become confident in your ability to do mathematics with understanding
- Explore Mathematics and become a persistent and successful mathematical problem solver
- Learn to reason, justify and communicate mathematically
- Think critically and creatively and learn to apply different system of analysis
- Realize that teaching mathematics is much more than just showing people how to manipulate formulas and solve problems.
- build new mathematical knowledge through problem solving;
- solve problems that arise in mathematics and in other contexts;
- Apply and adapt a variety of appropriate strategies to solve problems; monitor and reflect on the process of mathematical problem solving.

Learning Objectives/Outcomes:

- **Course Objectives:**  
  At the end of this course, the student will be able to:
  - Be able to describe the meaning and importance of “problem solving” in elementary-school mathematics
  - Demonstrate the ability to solve problems related to sets, whole numbers, and functions
  - Demonstrate the ability to solve problems in number theory
  - Use the concept of proportional reasoning in daily life applications

- **General Education Learning Outcomes:**  
  In this course, the student will:
  - Explore mathematics
  - Make connections between different areas of knowledge and different ways of knowing
  - Be able to locate, evaluate and organize information including the use of information technologies.
  - Think critically and creatively, learning to apply different systems of analysis.
  - Develop problem solving skills that incorporate multiple viewpoints and differing contexts in their analysis.
  - Cultivate intellectual curiosity and self-responsibility, building a foundation for life-long learning.
Course Outline
Priority will be given to understanding the material in depth rather than covering more topics. This schedule is subject to change by the instructor. Any changes to this schedule will be announced in class. We will try to cover as much as we can from the following topics as time permits.

<table>
<thead>
<tr>
<th>TOPICS</th>
<th>TIMELINE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sets and Logic, numeration system, whole numbers</td>
<td>September</td>
</tr>
<tr>
<td>Number theory, Integers</td>
<td>October</td>
</tr>
<tr>
<td>Rational Numbers, Decimals, proportional reasoning</td>
<td>November</td>
</tr>
<tr>
<td>Real Numbers</td>
<td>December</td>
</tr>
</tbody>
</table>

Course Evaluation
This course will utilize the following instruments to determine student grades and proficiency of the learning outcomes for the course.

Exams – Written in-class closed-book tests to measure knowledge of presented course material.
Portfolio- In and out of class work designed to supplement and reinforce course material.
Quizzes – Weekly quizzes to help students keep fresh with the material.
Projects- At least one group project to apply the material learnt in class.

Grading Matrix:

<table>
<thead>
<tr>
<th>Instrument</th>
<th>Value</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>Online Quizzes</td>
<td>15 quizzes at 7 points</td>
<td>100</td>
</tr>
<tr>
<td>In Class Quizzes</td>
<td>6 quizzes at 25 points each</td>
<td>150</td>
</tr>
<tr>
<td>Portfolio</td>
<td>Class activities, HW and attendance</td>
<td>100</td>
</tr>
<tr>
<td>Hour Exams</td>
<td>2 exams at 150 points each</td>
<td>300</td>
</tr>
<tr>
<td>Project</td>
<td>One group project</td>
<td>50</td>
</tr>
<tr>
<td>Final Exam</td>
<td>One comprehensive exam</td>
<td>300</td>
</tr>
<tr>
<td>Total:</td>
<td></td>
<td>1000</td>
</tr>
</tbody>
</table>

The following standard grading scale will be used to determine your final letter grade:

\[100\% \geq A \geq 90\% > B \geq 80\% > C \geq 70\% > D \geq 60\% > F \geq 0\].

Technology Use Policy:
You cannot use the TI-89 Calculator or any other calculator, which performs symbolic operations.

Homework Policy:
Homework will be into two parts, recommended part, that is for practice and the student doesn’t need to turn in and another part that is to be handed in at the beginning of the class on the due date. You should view the assigned homework problems as the minimum number of problems required to attain some level of mastery of the material. I deem it acceptable for students to work in groups as they make their preliminary efforts to explore and work through homework problems. However, after any such preliminary and cooperative efforts, I expect each student to write up his/her final homework papers individually and without outside
assistance. The act of copying another student's homework, or writing a problem solution as dictated by a tutor or from a solution manual, constitutes academic misconduct. You should do all homework problems but only selected problems will be graded. Be as neat as possible on the homework and try to keep the problems in order with space between them. Late homework will NOT be accepted.

**Online Homework Assignments** (on MyMathLab)
There will be different online quizzes and homework assignments that every student needs to complete on line using MyMathLab. Each student should buy an access code for MyMathLab to get access to these assignments. Students must purchase and register in MyMathLab (MML) by the 3rd class meeting. Students may access MML at any general access lab on campus. More information about the due dates of the assignments will be announced in class.

- For each section covered in the course there will be an online Homework assignment on MyMathLab.
- You will have an unlimited number of attempts to complete the assignment.
- You must score at least 60% on each Online Homework Assignment to access the corresponding Online Quiz.
- The Online Homework Assignments on MyMathLab won’t count towards your overall grade.

**Online Quizzes** (on MyMathLab)
- There will be an Online Quiz on each section covered in class.
- Remember! You must earn at least 60% on the corresponding Online Homework Assignment (on MyMathLab) before you can access that Online Quiz.
- Online Quizzes’ due dates will be announced on MyMathLab and there will be no extension for the due times for any reason.
- You are supposed to work the Online Quizzes on your own.
- At the end of the semester only the best 15 online quizzes will be considered.

**In-class Quizzes** (in class)
- In-class quizzes will be generally during the first 15 minutes of the class. Be one time so you will not get all the time for the quiz. The dates for the quizzes are pointed on the schedule below.
- There will be 9 in-class quizzes throughout the course. At the end of the semester, each student’s best 6 quizzes will be added to get a 150 possible-point total.
- There will be no make-ups for any missed in-class quizzes for any reason. Instead, at the end of the semester only the best 6 in-class quizzes will be considered. You have 4 quizzes to miss so do not ask for make ups.
The material that will be covered in the quizzes will be announced a head of time.

**In Class Exams** (in class)

- There will be two Mid-term Exams. The date for each exam is pointed in the schedule below.
- The final exam will be comprehensive. Students must take the final exam at the prescribed time; no exceptions. Make necessary arrangements now to attend the final exam.
- The student’s grade is determined solely by his/her performance on the evaluation criteria and the grade assignments listed above. *Do not expect Extra Credit assignments!*

**Email Policy:**
Use your Blackboard email account to contact me. You should check your email account on the Blackboard every day. You are responsible for any information that I send out via email. Due to privacy rights, I will not discuss grades over the phone. I will only answer emails from your Blackboard account.

**Make-up exam policy:**
Exams should be taken as scheduled in the class time. No makeup examinations will be allowed except for documented emergencies (See Student Handbook). All requests for make-up exams MUST be submitted to the instructor in writing, with the supported documents. It is imperative that you contact your instructor as soon as possible (do NOT wait until you return to class!).

**Mathematics Lab (Free Tutoring):**
There are tutors available to help you on walk-in bases at the Mathematics Lab located in DAL1 3rd floor. The Math lab will be open during the following times:

- MW: 9:00am-7:00pm
- TR: 10:00am-7:00pm
- F: 5:00pm-7:00pm
- S: 10:00am-3:00pm

Online tutoring is also available. Visit the Mathematics Lab webpage at [www.untdallas.edu/ml](http://www.untdallas.edu/ml) for more info about the services offered at the Mathematics lab.

**General Policies:**
- The first and most fundamental expectation I have for everyone in the class is to respect one another. Among other things, this means that only one person speaks at a time, no
one works on anything not related to the class (no cell use, no texting, no reading, no sleeping,...) and everyone will put forth an honest effort.

- It is the student’s responsibility to stay abreast of all class announcements and changes made to this syllabus in class, whether present or not.
- Leaving and entering the class back is generally not allowed. You can leave the class if you are not returning or for real emergency case. Leaving the class should be by the permission of the instructor.
- You are expected to review all graded quizzes, homework and exam papers as soon as they are returned. All questions about the grading of quizzes, homework or exam papers must be reported within seven calendar days of the date on which the paper was returned.
- You will NOT get better than a grade of C if you miss more than 5 classes. Missing more than 5 classes may result in being dropped from the course with a WF.
- To do well in this course, attend class every meeting on time, be prepared to work for the full class time, bring all necessary materials to class, participate as much as possible, do the homework and extra problems steadily every day rather than once a week. Don’t be afraid to make mistakes or ask questions, the more you get involved, the better you’ll do!
- My door will always be open and you should feel free to e-mail me if you have questions. Don’t stress out about math! You have the abilities to do very well as long as you work hard.

Attendance and Participation Policy:
The University attendance policy is in effect for this course. Class attendance and participation is expected because the class is designed as a shared learning experience and because essential information not in the textbook will be discussed in class. The dynamic and intensive nature of this course makes it impossible for students to make-up or to receive credit for missed classes. Attendance and participation in all class meetings is essential to the integration of course material and your ability to demonstrate proficiency. Coming to class late or leaving it early is considered an absence. Students are responsible to notify the instructor if they are missing class and for what reason. Students are also responsible to make up any work covered in class. It is recommended that each student coordinate with a student colleague to obtain a copy of the class notes, if they are absent. More than 5 classes of absence may result in being dropped from the course with a WF. A student may NOT get better than a grade of C if he/she misses more than 5 classes.

University Policies and Procedures

Students with Disabilities (ADA Compliance): The University of North Texas at Dallas makes reasonable academic accommodation for students with disabilities. Students seeking accommodations must first register with the Disability Services Office (DSO) to verify their eligibility. If a disability is verified, the DSO will provide you with an accommodation letter to
be delivered to faculty to begin a private discussion regarding your specific needs in a course. You may request accommodations at any time, however, DSO notices of accommodation should be provided as early as possible in the semester to avoid any delay in implementation. Note that students must obtain a new letter of accommodation for every semester and must meet/communicate with each faculty member prior to implementation in each class. Students are strongly encouraged to deliver letters of accommodation during faculty office hours or by appointment. Faculty members have the authority to ask students to discuss such letters during their designated office hours to protect the privacy of the student. For additional information see the Disability Services Office website at http://www.untdallas.edu/disability. You may also contact them by phone at 972-338-1777; by email at UNTDdisability@untdallas.edu or at Founders Hall, room 204. (UNTD Policy 7.004)

**CoursEval Policy:** Student’s evaluations of teaching effectiveness is a requirement for all organized classes at UNT Dallas. This short survey will be made available to you at the end of the semester, providing you a chance to comment on how this class is taught. I am very interested in the feedback I get from students, as I work to continually improve my teaching. I consider students’ evaluations to be an important part of your participation in this class.

**Academic Integrity:** Academic integrity is a hallmark of higher education. You are expected to abide by the University’s code of Academic Integrity policy. Any person suspected of academic dishonesty (i.e., cheating or plagiarism) will be handled in accordance with the University’s policies and procedures. Refer to the Student Code of Academic Integrity (Policy 7.002) at http://www.untdallas.edu/sites/default/files/page_level2/pdf/policy/7.002%20Code%20of%20Academic_Integrity.pdf Refer to the Student Code of Student Rights, Responsibilities and Conduct at http://www.untdallas.edu/sites/default/files/page_level2/hds0041/pdf/7_001_student_code_of_conduct_may_2014.pdf Academic dishonesty includes, but is not limited to, cheating, plagiarizing, fabrication of information or citations, facilitating acts of dishonesty by others, having unauthorized possession of examinations, submitting work of another person or work previously used without informing the instructor, or tampering with the academic work of other students. In addition, all academic work turned in for this class, including exams, papers and written assignments must include the following statement: “On my honor, I have not given, nor received, nor witnessed any unauthorized assistance that violates the UNTD Academic Integrity Policy.”

**Bad Weather Policy:** Campus facilities will close and operations will be suspended when adverse weather and/or safety hazards exist on the UNTD campus or if travel to the campus is deemed dangerous as the result of ice, sleet or snow. In the event of a campus closure, the Marketing and Communication Department will report closure information to all appropriate major media by 7 a.m. That department will also update the UNTD website, Facebook and Twitter with closing information as soon as it is possible. For more information please refer to http://www.untdallas.edu/police/resources/notifications
Diversity/Tolerance Policy: Students are encouraged to contribute their perspectives and insights to class discussions. However, offensive and inappropriate language (swearing) and remarks offensive to others of particular nationalities, ethnic groups, sexual preferences, religious groups, genders, or other ascribed statuses will not be tolerated. Disruptions which violate the Code of Student Conduct will be referred to the Dean of Students as the instructor deems appropriate. (UNTD Policy 7.001)

Copyright Policy:
The handouts used in this course are copyrighted. By "handouts," I mean all materials generated for this course, which include but are not limited to syllabi, lecture notes, quizzes, exams, in-class materials, review sheets, projects, and problems sets. Because these materials are copyrighted, you do not have the right to copy and distribute the handouts, unless I expressly grant permission.

Classroom Etiquette:
Appropriate behavior is expected of all students taking this course.
- Arrive to class promptly and do not leave until the scheduled ending time of the class.
- If you must arrive late or leave early, please do so as discreetly as possible and take a seat near the door.
- Turn off all non-medical electronic devices such as pagers, cell phones, laptops, etc. Take off the headphones.
- Do not read newspaper or work on unrelated assignments during class.

Grade Assignment:
- The student course grade is assigned according to the evaluation criteria and grading assignment stated on this syllabus.
- The grade is completely objective and is determined solely by student performance on each of the evaluation criteria (in-term exams, in-class quizzes, on-line quizzes, and the final exam).
- Do not expect extra credit work or bonus grade assignments.

Student Behavior:
- Student behavior that interferes with an instructor’s ability to conduct a class or other students’ opportunity to learn is unacceptable and disruptive and will not be tolerated in any instructional forum at UNT.
- Students engaging in unacceptable behavior will be directed to leave the classroom and the instructor may refer the student to the Student Life Center to consider whether the student’s conduct violated the Code of Student Conduct.
- The university’s expectations for student conduct apply to all instructional forums, including university and electronic classroom, labs, discussion groups, field trips, etc. The Code of Student Conduct can be found at http://dallas.unt.edu/sites/default/files/page_level2/pdf/policy/7.001%20Code%20of%20Student%20Rights%20Responsibilities%20and%20Conduct.pdf
