Received over 100 Commendations

- 70 Internal Commendations
- 40 External Commendations

## **Goals**

Within the next five years my goal is to increase the leadership knowledge of the Dallas Police Department. This will be done through improving curriculum and providing training to all levels of the police department. In addition, I will continue to work on improving research to demonstrate evidence based policing concepts.

## **Leadership Autobiography**

Throughout my career I have worked to improve myself and others around me. I have spent time educating other officers and non-sworn employees on financial matters, computer software and the benefits of higher education.

In early 1990 I found an expired state grant. This grant was converted to help in the development and purchase of computer hardware, training and software to improve crime analysis in the Dallas Police Department. This crime analysis software was successful, was upgraded and used until 2003.

[gsmith@callaw.org](mailto:gsmith@callaw.org)

---

In 1990 I worked with a group of individuals to create and develop a crime analysis association. This organization started with ten members and has grown to several thousand from many different countries as of 2015. This organization has vastly improved the profession of crime analysis.
